EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bert Krages on March 28th, 2006 in order to overcome minor informalities. The application has been amended as follows:

- In claim 11, line 7, after the word 'outwardly' insert --of said outer cylindrical face of the end of the weight bar--.

2. The following is an examiner's statement of reasons for allowance:

Dalebout (US Pat. App. Pub. No. 2005/0079961), shown in the figure below, discloses a weightlifting assembly comprising a tubular handle or 'weight bar' (12) that houses locking mechanisms or 'plungers' (18a and 18b) at its ends that controllably rise and retract from openings of the bar.

Dalebout fails to disclose the locking mechanisms or 'plungers' to *radially* rise and retract from the outer cylindrical face of the handle. Furthermore, the 'plungers' do not *radially* contact the central opening of the weight plates.

The prior art of record fails to disclose a weightlifting assembly comprising plungers or a locking/detent mechanism that radially emerges and retracts from the outer surface of a weight bar, or plungers formed as helical members inserted in a spiral guide slot in the weight bar, wherein the plungers contact weight plates in order to maintain them on the bar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
